DETAILED ACTION

1. *This Office Action is in response to communication filed 6/25/04 (paper 24).*

Claims 1, 8, 15, 22 and 29-34 are pending.

2. In view of the Appeal Brief filed on 6/25/04, PROSECUTION IS HEREBY REOPENED. The Office Action is as set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

Allowable Subject Matter

3. Claims 1 and 29-34 are allowed.

4. Claims 8, 15 and 22 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 1st paragraph, set forth in this Office action.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 8, 15, and 22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The limitation “wherein the processor unit evaluating the message test the ability of each of the plurality of pre-determined candidate character sets to express that character by performing a logical operation between the bit masks that identify ...each of the message ” is not described in the specification as to enable one skill in the art on how to make or use it. In fact, the specification on page 11, lines 5-8 described “in step 204, the parsing of the textual message... a logical And operation is preformed between the supplied character sets’ bit mask and the value returned from the character’s row of the character of the character table bank 110. The specification does not describe “logical operation between bit masks”, but described, “ Logical operation between bit mask and a value form the character table bank. The examiner cannot find this limitation in the specification. The applicant is advised to point out exactly where this limitation is described in the specification.
